

Plan in these two weeks.

- Basic skills on Git. I hope you can learn the basic commands of Git and install lazygit on your computer. We will work on Git in the future. That is important for us! The manual is in **/docs**.
- Know how to use the code I sent you. The beginning of your work is to learn **how to use code!**
- Basic skills on LaTeX. Write a report every two weeks to tell me what you have done!
- Paraview. Try to use it just for fun!
